Who We Are

We have been in the forefront of our industry with more than 50 years of experience behind us in the design, production & installation of architectural aluminum systems. Our state-of-the art production is one of the most advanced in the industry.

// OUR MISSION

To pass along the passion we have for our products to our clients. We want to improve their quality of life, by offering quality products to them.

// OUR VISION

Become the household name & leader in the industry, when it comes to aluminum fenestration systems and architectural applications.

Our Values

Those values sit at the core of our business philosophy and are reflected in the way we highly regard our customers.

// INTEGRITY

We pride ourselves in the transparency that we have always maintained with our clients. We know it is crucial that we always deliver what is promised.

// TEAM SPIRIT

We understand that our success is the result of extensive collaboration on all levels within the organization and that every member plays an active role.

// PASSION

We live and breathe windows & doors... With 50 years in the industry, what drives us the most is to be able to materializing our client's vision into reality. while combining their personality with our highly functional, modern & elegance fenestration systems.

// MARKET PRESENCE

Our global involvement allows us to keep up with the latest trends in the industry resulting in us leading the way in the industry whether it be the state of the art technology used in our products or the uniqueness of our modern designs.

Our Products

Every one of our products are designed
with one goal in mind

“ Always offer quality
products for a quality life ”

- Hinged window & door systems
- Sliding window & door systems
- Bi-folding door systems
- Entrance doors
- Curtain wall & facade systems
- Customized fenestration systems

Support

From design to installation

To offer the quality products expected from us to perfectly suit our client's demands, we work hand in hand with them as early as the design stages through the installation.

Our team is dedicated to providing technical support for any projects with special attention for design requirements of each buildings while providing solutions to optimize costs.

Our Support team offers comprehensive technical & engineering support for large scale construction projects collaborating closely with architects, engineers & project managers.

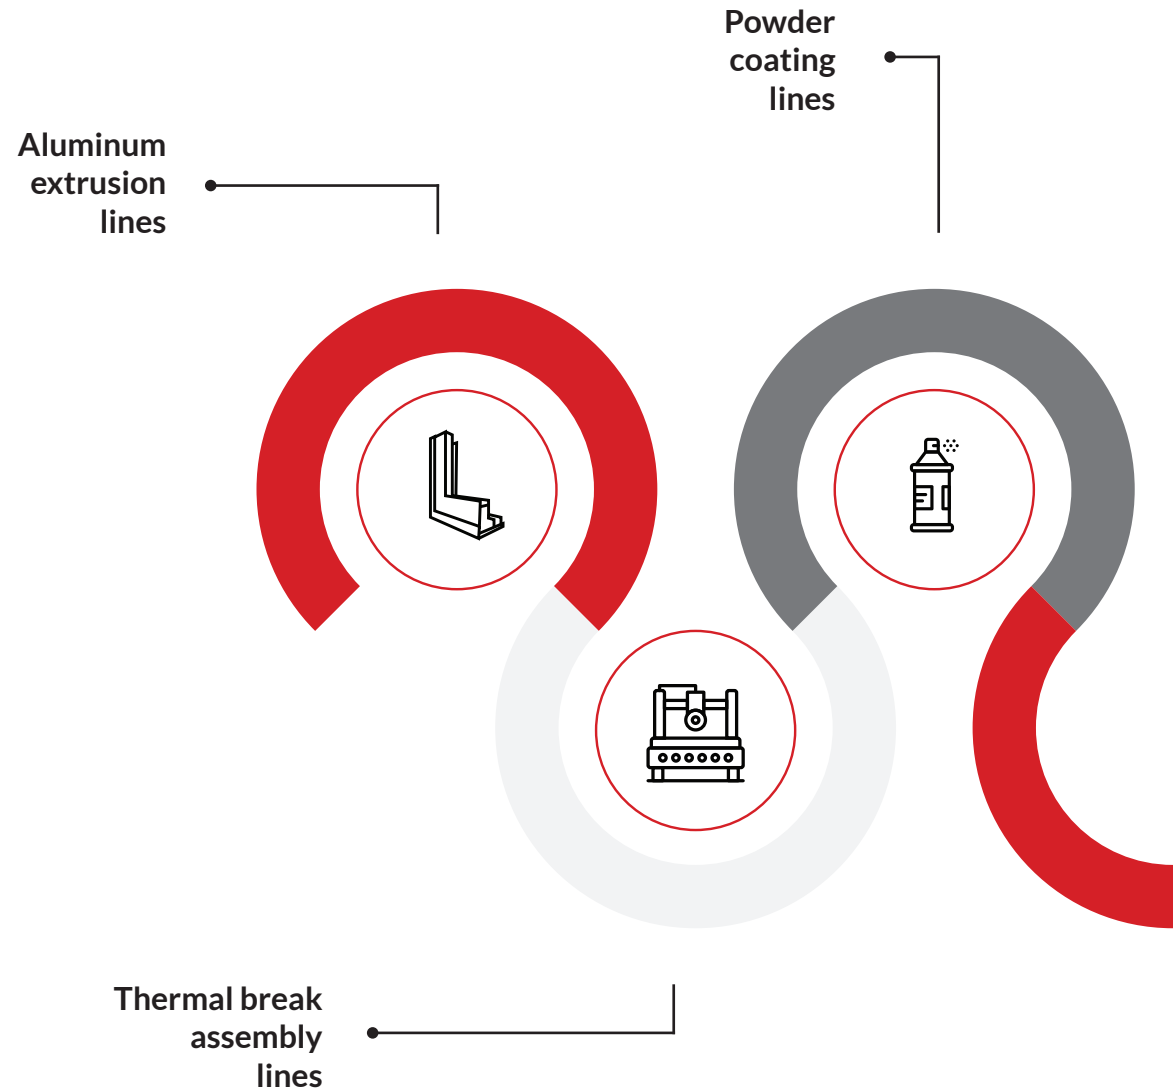

Quality Assurance

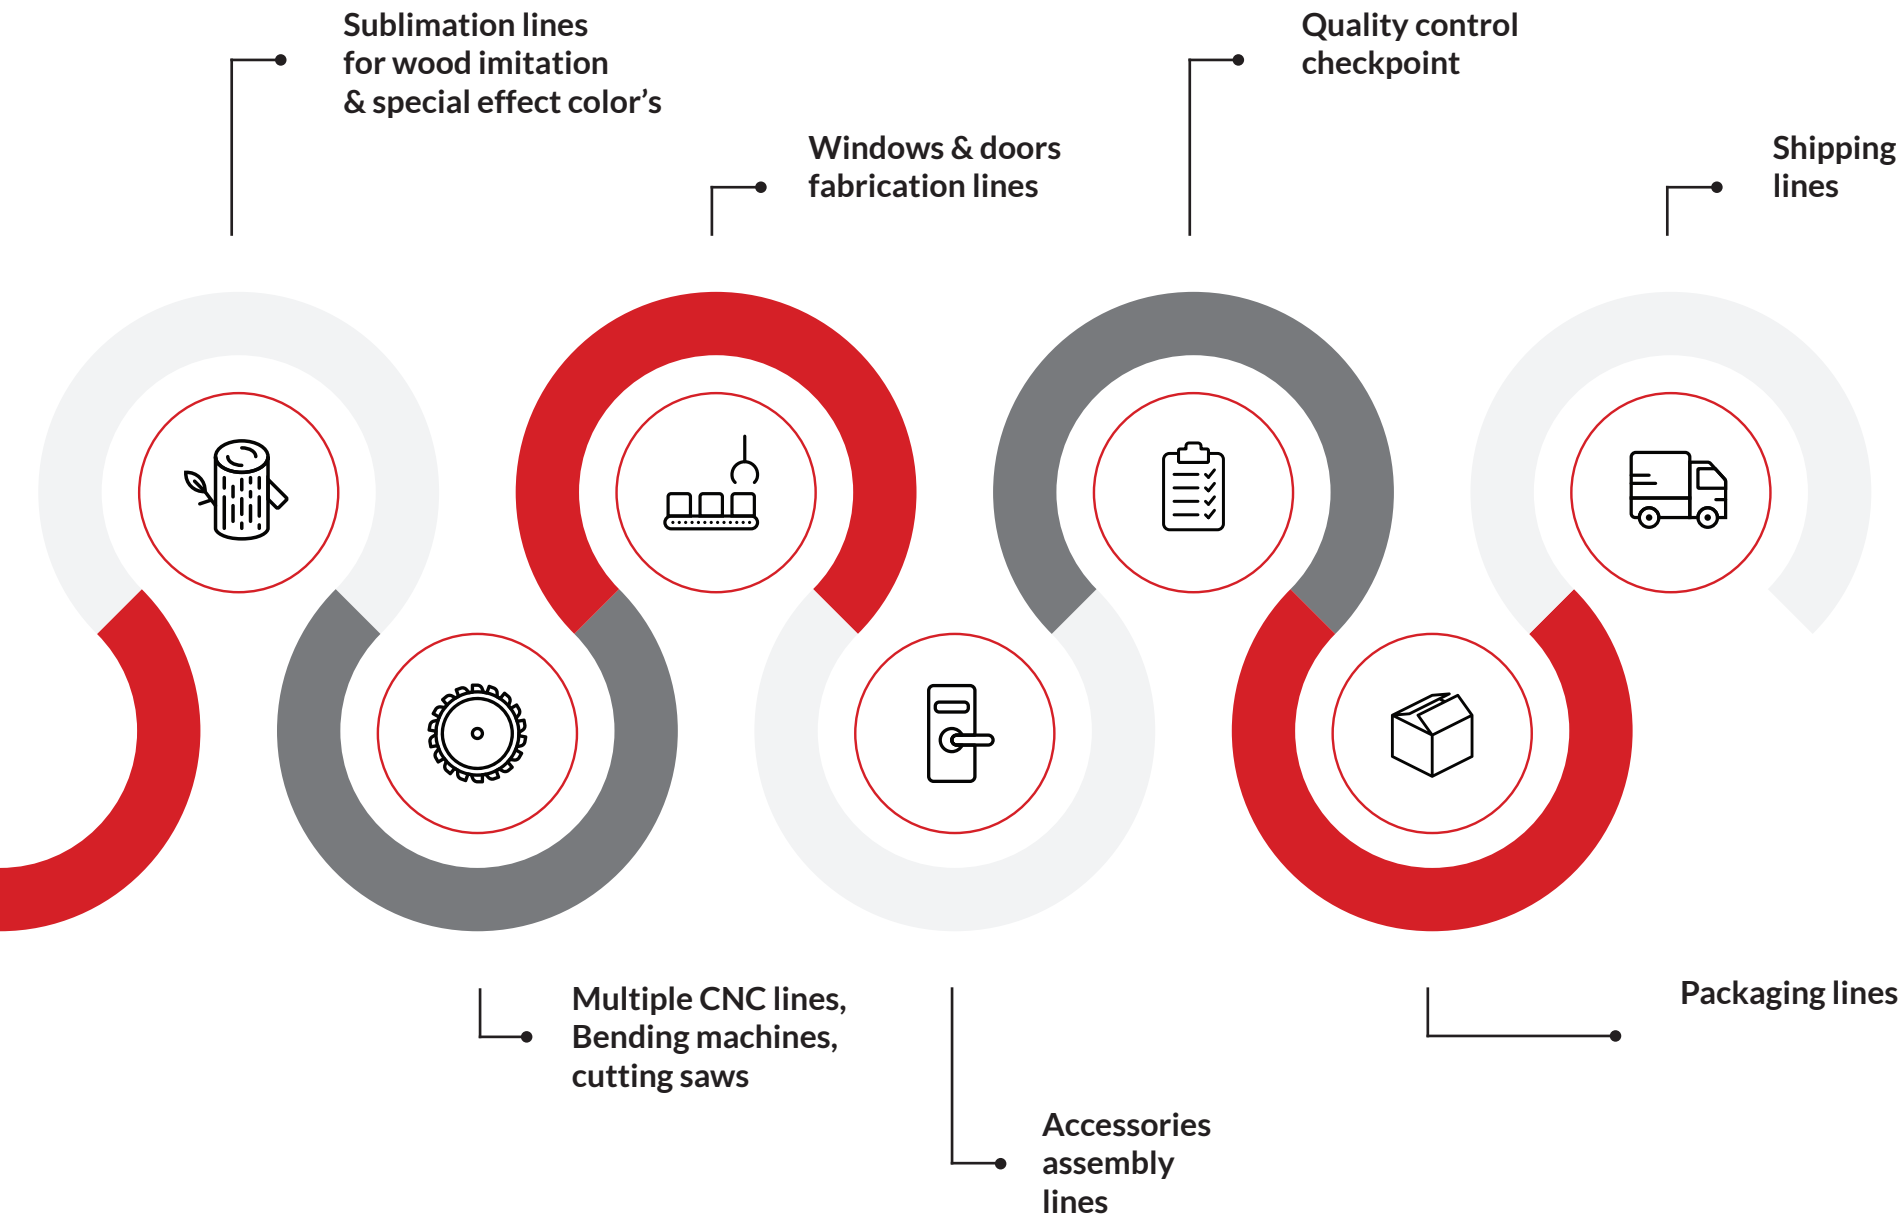

We have put in place strict production and quality control guidelines as well as a certification process for our architectural systems.

To ensure that we meet the highest standards expected from our clients, our in-house quality control laboratories conduct extensive testing on our products throughout the entire production process.

High Vertical Integration

From the foundry to various surface finishes, we can control every aspect of the production process. Here are a few of the in-house processes that allows us such control.

Cutting Edge Research

Research & development plays an essential role in our current positioning in our market.

Our team of experienced and specially trained engineers constantly remain at the cutting edge of technological advancement in the industry continuously perfecting technological solutions.

Testing Certifications

Alumalco's products are tested and certified for North American (CAN/CSA, NAFS, AAMA/WDMA, A440-00) standards.

Distribution

Our extensive nationwide distribution network provides us with an important competitive edge, optimizing the fluidity and effectiveness of our Logistics process.

Human Factor

The people behind Alimalco are the reason for our ongoing success. They play an essential role in achieving our high quality standards.

- └ Group trainings are conducted regularly regarding new products as well as continuous efforts are put into place to improve knowledge on our existing ones.

Sustainability

At Alumaco, we understand and firmly believe that our growth can and **MUST** go hand in hand with a sustainable environment.

Implementing concrete measures and targets such as:

01 // One

Periodical environmental inspections

02 // Two

Introducing energy saving measures

03 // Three

Extensive Training our staff

04 // Four

Implementing waste management minimization and recycling strategies

05 // Five

Taking the environmental performance of our suppliers into account
